BLADDER DRAINAGE & STRICTURE THERAPY

Navigating even
the most difficult tract.

Flexicare has a wide range of intermittent catheters for bladder drainage and stricture therapy. We provide a range of Standard, Female and Paediatric lengths meeting all patients requirements.

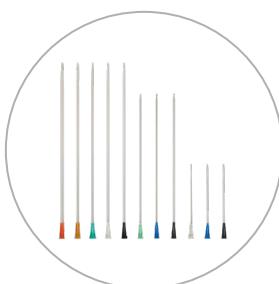

Choice of Tips

Our selection of tips are available to navigate even the most difficult tracts and are available in Standard, Tiemann, Tapered and Soft Tip.

Hydrophilic or Uncoated

Our sterile catheters are supplied in a choice of hydrophilic or uncoated catheters in easy to open packaging.

Colour Coded

All our catheters and meatal dilators are colour coded for easy size recognition.

Step-by-Step Catheter Guides

Our easy to follow adult and baby guides help patients keep track of catheterisation and guide them through the procedure with ease. Visit our download and video pages at myflexicare.com.

WYCATH HYDROPHILIC INTERMITTENT CATHETERS

Our sterile Hydrophilic coated catheter comes with our Wycath water sachet sealed inside the packaging. Simply press the button to release the water before insertion. Easy to open for patients with dexterity difficulties and supplied in a range of tips.

CONTOURED, DISCREET LEG BAGS

offering a secure
and comfortable fit.

Our range of leg bags are contoured to offer a comfortable fit whilst distributing urine evenly, giving patients confidence wherever they are.

Non-return Valve

All our drainage bags are fitted with a non-return valve (NRV) as standard.

Needle-Free Sample Port

Our sample port eliminates the risk of needle stick injury and the smooth exterior reduces potential marking of the skin and visibility under clothing.

Date and Use Box

Clear indications of use and a date box allow information to be recorded on all our bags.

Secure Connection

Our stepped connectors are featured on all our leg bags offering secure and reliable connection to catheters and drainage bags.

Range of Lengths

Available in 350ml, 500ml and 750ml with a choice of tube lengths.

Easy to Operate, Taps

The lever taps fitted to our leg bags are 180 degree, 2 stage action taps. Easy to operate and reducing the risk of accidental opening.

LEG BAGS

Our leg bags are available in short (7cm) or long (30cm) tube lengths and for those requiring a customised length, we offer a 500ml capacity bag with an extra-long adjustable length tube (60cm).

Standard Leg Bags

Our standard leg bag is contoured offering an improved and comfortable fit while distributing urine evenly.

DESCRIPTION	SHORT TUBE HOSPITAL	LONG TUBE HOSPITAL	SHORT TUBE COMMUNITY	LONG TUBE COMMUNITY	ADJUSTABLE COMMUNITY
350ml Sterile leg bag	-	-	00-1352	00-2352	-

Hospital codes with non-flocked backing are supplied in packs of 100 and community codes with flocked backing for improved comfort in packs of 10.

giving patients
complete confidence
wherever they are

DRAINABLE OVERNIGHT BAGS

robust and versatile
drainage solution.

Our drainable urine bags provide a robust and versatile urine drainage solution for both hospital and community environments. All drainable 2 litre bags are fitted with a non-return valve to prevent urine reflux.

Easy to Operate, Taps

The F4 bags are fitted with a choice of a lever tap or T-tap. Both taps are simple and easy to operate.

Free and Rapid Flow

Our soft wide bore drainage tubing allows unimpeded flow of urine and comfort against the skin.

Lower Profile

The F4LS side tap lowers the profile of the drainage bag and moves the tap clear off the floor to prevent accidental contamination.

Needle-Free Sample Port

The needle-free sample port eliminates the risk of needle stick injury.

DESCRIPTION	HOSPITAL	COMMUNITY
F4 sterile 2 litre drainable bag with T-tap	00-1204	00-1200

F4LS sterile 2 litre drainable bag with lever tap and side pouch	00-1207L	-
F3 non-sterile 2 litre drainable bag with T-Tap	00-2206	-

Hospital codes are supplied in packs of 100 and community in packs of 10.

F4 PLUS 2 LITRE BAG RANGE

The F4 Plus bag is primarily used with patients who have undergone surgery. It has an integral hanger and a pasteur drip chamber to observe urine drainage.

Hydrophobic Filter

The F4 Plus hydrophobic filter prevents air building up in the bag without allowing proteins or fluids to pass through.

Integral Bag Hanger

The hanger can fit securely to any bed. The inlet tube is maintained in position to allow for direct flow into the drip chamber.

Non-Return Valve

The F4 Plus bag is fitted with a second non-return valve preventing the contents of the bag returning to the drip chamber, eliminating reflux and providing directional flow of fluids.

Drip Chamber

The pasteur drip chamber enables the urine flow to be observed.

Enclosed Tap Protector

The lever tap can be placed in the protective tap holder which keeps the outlet clear of possible contamination from the floor whilst protecting against accidental opening.

DESCRIPTION	HOSPITAL	QTY
F4 Plus sterile 2 litre drainage bag	00-1208	20

ONCE DRAINABLE 2 LITRE BAGS

just twist-snap,
drain and dispose.

F2-EZ is a 2L drainage bag designed to be opened quickly whilst allowing controlled drainage of fluids. The bag is designed with a simple twist-snap tap to enable the urine to be directed and emptied easily.

F2-EZ Top Located Tap

The Twist-snap tap is located in the top corner of the bag to offer a 'jug' effect and greater control when emptying.

Secure Connection

Our stepped connectors are featured on the F2-EZ and F2-EZB offering secure and reliable connection to catheters and drainage bags.

Twist-Snap Tap

The innovative easy-to-open angled connector with wide bore for rapid drainage is twisted to break the seal and drain.

DESCRIPTION	HOSPITAL	COMMUNITY
F2-EZ non-sterile 2 litre once drainable bag with top tap	00-2203	00-2203C
F2-EZB non-sterile 2 litre once drainable bag with bottom tap	00-2208	00-2208C

Hospital codes are in packs of 100 and community in packs of 10.

F2 2 LITRE BAG RANGE

Flexicare F2 bag provides a clean and safe method of urine drainage. F2 is a high quality bag that is simple and easy to use, assuring confidence to clinicians and comfort for users.

Easy to use

The simple and easy-to-use tear mark can be used to open and drain the bag when needed. After use, the bag can be easily disposed of making the F2 an ideal bag for use in both hospital and community settings.

Safe and Secure Drainage

The non-return valve (NRV) is designed to allow low pressure drainage in one direction while preventing all flow in the opposite direction, reducing the risk of ascending infection.

Secure Connection

The stepped connector is easily inserted into your drainage system and provides a secure connection.

DESCRIPTION	HOSPITAL	COMMUNITY
F2 non-sterile 2 litre once drainable tear to open bag	00-2201*	00-2202C
F2 sterile 2 litre once drainable tear to open bag	00-2202	-

*Non-sterile hospital codes are supplied in packs of 250, sterile codes are in packs of 100 and community in packs of 10.

easy to use
simply tear the bag
drain and dispose

URIMETER

The Flexicare Urimeter is a sterile closed collection system with an integral measuring chamber. The vertical drainage system and incorporated non return valves (NRV's) ensure the measuring chamber empties fully once the reading has been taken to ensure accurate measurements especially with low urine output.

Enclosed Tap Protector

The lever tap can be housed in the holder when not in use to prevent the tap touching the floor or being accidentally opened.

Clear print and date box

Clear indications of use and a date box allow information to be recorded and use monitored.

Hydrophobic Filters

The hydrophobic filter allows for the air and any gas build up in the bag to escape without allowing proteins or fluids to pass through.

Vertical Drainage

The vertical drainage ensures accurate measurements.

Safe and Secure Drainage

Non-return valves reduce the risk of ascending infection and allows low pressure drainage without compromising the anti-flux property.

Secure fastening

The integral hangers and straps ensure the Urimeter is securely attached to any bed frame.

DESCRIPTION	HOSPITAL	QTY
Urimeter with 150mm Tubing	00-1227	20

WYSTOPPER STOMA STOPPER

Wystopper- a flexible clear soft stoma stopper designed by a clinician to maintain stoma sites, especially continent urinary diversions and antegrade continence enema (ACE) tracts.

Tapered Tip

The clear soft silicone aids patient comfort and tapered tip to ease insertion.

Mushroom Cap

The mushroom shaped cap lies flush against the skin for discreetness.

Choice of sizes

Available in sizes 10Ch, 12Ch, 14Ch, and 16Ch in 30mm or 60mm lengths.

DESCRIPTION	10Ch	12Ch	14Ch	16Ch	QTY
Wystopper Stoma Stopper 30mm	WS0310	WS0312	WS0314	WS0316	3
Wystopper Stoma Stopper 60mm	WS0610	WS0612	WS0614	WS0616	3

EZ-FLOW CATHETER VALVE

discreet and secure

EZ-Flow is an inconspicuous light weight neutral coloured catheter valve. The valve is designed to offer patients the flexibility of choice in managing their urinary drainage system. In line with all catheter valves, the valve remains attached to the catheter for 5 – 7 days.

Patient Comfort

The outlet sleeve is made of soft PVC that reduces pressure marks or discomfort for the patient.

Secure Fitting

The Ez-Flow multiple ridged connector ensures a secure fit with the catheter.

Patient Suitability

Suitable for patients with adequate bladder capacity, sensation, good dexterity and cognitive awareness.

Easy to Operate, Lever Tap

Ez-Flow has a 180°, 2 stage action tap. Easy to operate, the slightly firmer second stage reduces the risk of accidental opening on clothing or bedding.

DESCRIPTION	CODE	QTY
EZ-Flow Catheter Valve	00-0060	5

FLEXISLEEVE LEG BAG HOLDER

FlexiSleeve is a knitted Lycra, latex free leg bag holder to replace leg straps.

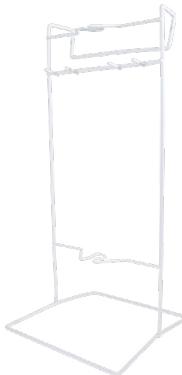

Distributing weight evenly

Offering more comfort to the bag wearer by distributing weight evenly around the leg.

DESCRIPTION	SMALL	MEDIUM	LARGE	X-LARGE	QTY
Leg Bag Holder	00-0035	00-0036	00-0037	00-0038	3

BAG STAND

Designed to hold any 2 litre bag ensuring the tap is clear off the floor to reduce the risk of potential contamination.

Plastic Coating

The strong metal stand is plastic coated making it easy to clean and ensuring that there are no sharp edges.

DESCRIPTION	CODE	QTY
Bedside bag stand	00-0022	50

LEG BAG STRAPS

Flexicare leg straps feature an anti-slip silicone weave which grips the leg and ensures a secure and comfortable fit.

Secure Fastening

Secure Velcro fastening that can be easily adjusted.

DESCRIPTION	HOSPITAL	COMMUNITY
Lycra Anti-Slip Leg Straps	00-0032	00-0032C
Neutral Lycra Anti-Slip Leg Straps	-	00-0033C

Hospital codes are supplied in packs of 100 and community in packs of 10.

FLEXIHANG BAG HANGER

FLEXIHANG BAG HANGER

secure overnight
drainage

FlexiHang bag hanger is a universal 2 litre urine bag hanger uniquely designed to be fitted to beds with or without side bars. FlexiHang can be secured between the mattress and bed frame or hung from the bed using the flexible hooks.

Flexible Hooks

Wide flexible hooks ensure stability whilst hooked onto the bed.

Tube Holder

Secures the outlet tube in a vertical position to ensure optimum urine flow.

Easy Clips

The two snap-fit clips shut tight to hold the urine bag firmly in place.
